

ABSTRACT OF THE DISCLOSURE

RESIN-COATED METAL SHEET FOR PARTS OF ELECTRONIC MACHINERY AND TOOLS AND PRODUCTION METHOD THEREOF

5

There is disclosed a resin-coated metal sheet for a part of electronic machinery and tools, which is a metal sheet coated with a resin on the surface, wherein a resin layer is composed of one or more resin selected from
10 polyester-series, epoxy-series, phenol-series and alkyd-series resins, the resin layer has a 0.1 to 10 μm thickness, and the resin layer contains 2 to 60 parts by weight of nickel with 0.1 to 100 μm of an average value in terms of maximum longer diameters, to 100 parts by weight
15 of the resin. The resin-coated aluminum sheet is excellent in anti-fingerprint property and formability, as well as excellent in electric characteristics.
